

ZETA opens new subsidiary in Kazakhstan

ZETA - end-to-end solution provider for the pharmaceutical industry - is continuing its global expansion and has opened a new subsidiary, ZETA Solutions LLC in Almaty, Kazakhstan, in August 2024. The goal is to support the local market with innovative solutions and at the same time strengthen the biotech and pharmaceutical industry in the CIS region.

ZETA Solutions, being part of the ZETA Group, offers the pharmaceutical and biotech industry customized services and solutions in the field of facility engineering and process equipment (upstream & downstream) for Kazakhstan and the CIS region. In addition, services such as design qualifications, conducting GMP reviews for existing production facilities, process simulation, and other technical services will be provided. The company draws on many years of experience and expertise in the industry and utilizes the combined know-how and skills of the ZETA Group. As a globally active end-to-end solution provider for the biotech and pharmaceutical industry, ZETA has established itself as a reliable general planner (EPCMv) for the implementation of large-scale pharmaceutical projects.

ZETA Solutions commits to strategic location in Kazakhstan

With the new office in Kazakhstan, ZETA Solutions can now also serve the regional biotech and pharmaceutical industry in the CIS region and offer high-quality services and solutions tailored to the needs of the region.

“We are proud to strengthen our presence in the region,” says Christian Gabriel, Regional Manager CIS of ZETA Solutions. “Kazakhstan is considered a strategic location for the pharmaceutical and biotech industry due to its favorable geographical location and the government's support in promoting innovation and technology. Our goal is to provide customized solutions to our local customers based on global best practices while ensuring compliance with local regulations”.

About ZETA

The ZETA Group is an end-to-end solution provider operating globally and specializing in the design, construction, automation, digitalization and qualification of customer-specific biopharmaceutical systems for aseptic process solutions.

As general planner (EPCMV), ZETA manages major, high-complexity EPCMV pharma projects and specifically reduces interfaces—from the planning and construction of the process system through the cleanroom design up to the technical building infrastructure. This design-build approach accelerates the project execution time by up to 50% and leads to creation of value earlier in the customer's CAPEX projects. In doing so, ZETA provides an active contribution to the rapid market introduction of vital active ingredients and patients benefit from earlier availability of pharmaceuticals such as anti-cancer medications, insulin and vaccines.

In the field of digitization, ZETA's fully integrated digital value chain—from engineering through qualification and operator management—has established the company as an innovation driver in the pharma and biotech industry. ZETA is also actively taking steps towards a more sustainable future for the entire industry: Holistic decarbonization strategies that reduce targeted emissions during the biopharmaceutical manufacturing process are integrated with sustainable energy sources for the power supply of the entire infrastructure and investment scenarios in renewable energy are evaluated using profitability calculations.
